The occupants of the boat which reached shore were utterly exhausted and many of them were badly frost-bitten. They had a harrowing experience, battling in the darkness for hours in the open boat against tempestuous seas on a treacherous coast, with the thermometer ten degrees below zero and an Arctic blizzard raging. They landed on shore some time during the day and reached the telegraph office at Musquodoboit Harbor last evening, whence they wired the first news of the disaster to the agents of the Furness line at Halifax, to which port the Damara was bound.

I suffered the most severe backache and other pains in the region of the kidneys. These were especially severe when stooping to lift anything, and often I could hardly straighten my back. The aching was bad in the daytime, but just as bad at night, and I was always lame in the morning. I was bothered with rheumatic pains and dropsical swelling of the feet. The urinary passages were painful, and the secretions were discolored and so free that often I had to rise at night. I felt tired all day. Half a box served to relieve me, and three boxes effected a permanent cure."

INVENTIVE INGENUITY.

An Austrian railway mechanic has discovered a process by which the smoke of warships can be entirely concealed from view.

A clock which seems to be preeminently adapted for the sick-room or hospital is the invention of Prof. Hirth, of Munich. It consists merely in the depression of a button, which cuts in a small electric lamp placed under the dial of an electrically-illuminated clock, throwing the shadow of the face and its hands upon the ceiling in a highly magnified state. Viewed from the bed of a reclining invalid, it obviates the irksome craning of the neck.

The man with the flowing mustache has not been forgotten by the inventor, despite the fact that the many mustache cups that one time or another have made their appearance on the market all proved pecuniary failures. The latest aspirant for the honors in this particular field is an Englishman, who offers a neat little device for attaching to soup spoons to facilitate the eating of soup by the possessors of long, flowing mustaches. It is made of aluminum and embodies a spring design, which admits of its attachment to practically any spoon.

A French electromotion company has produced an electric carriage in which the use of pinions, chains and gearing for transmitting motion to the driving wheels is entirely dispensed with. In this new machine the motors and the wheels are described as being one and the same thing. The axles receive their motive power directly from the accumulators. The weight of the carriage is thus reduced, and it is asserted that these "live-axle" machines can travel 20 to 30 per cent. farther than those of ordinary construction because of the saving of energy. The appearance of the new carriages is improved, except that the wheels have a clumsy look.

A man's darkest hour is when his wife turns on the light as he tries to sneak quietly upstairs at two o'clock in the morning.

HER BLOOD TOO THIN

GENERAL DEBILITY RESULTS FROM IMPOVERISHED BLOOD.

The Remedy That Makes New Blood—Banishes Weakness, Headaches, Indigestion and Nervous Troubles.

Hundreds of women suffer from headaches, dizziness, restlessness, languor and timidity. Few realize that their misery all comes from the bad state of their blood. They take one thing for their head, another for their stomach, a third for their nerves, and yet all the while it is simply their poor blood that is the cause of their discomfort.

If one sure remedy for making good, rich blood were used every one of their distressing ailments would disappear, as they did in the case of Mrs. Ella F. Stone, who had been ailing for years and was completely run down before she realized the nature of her trouble.

"For several years," said Mrs. Stone, "I suffered from general debility. It began about 1896 with indigestion, nervousness and steady headaches. Up to 1900 I hadn't been able to find any relief from this condition. I was then very thin and bloodless. An enthusiastic friend, who had used Dr. Williams' Pink Pills, urged me to give them a trial and I finally bought a box."

"I did not notice any marked change from the use of the first box, but I determined to give them a fair trial and I kept on. When I had finished the second box I could see very decided signs of improvement in my condition. I began to feel better all over and to have hopes of a complete cure."

"I used in all eight or ten boxes, and when I stopped I had got back my regular weight and a good healthy color and the gain has lasted. I can eat what I please without discomfort. My nervousness is entirely gone, and, while I had constant headaches before, I very rarely have one now. I cheerfully recommend Dr. Williams' Pink Pills to women who suffer as I did."

Mrs. Stone was seen at her pretty home in Lakewood, R. I., where as the result of her experience, Dr. Williams' Pink Pills are very popular. These famous pills are sold by all druggists. A book that every woman needs is published by the Dr. Williams Medicine Company, Schen
